

Bloodborne Pathogen

Training Certification

Per the Indiana State Board of Health and OSHA all staff members whose work may bring them into contact with body fluids are required to complete Bloodborne Pathogen training on an annual basis.

To meet this requirement, all staff are required to read a review of the corporation's exposure control plan, Hepatitis B vaccine information, information on PPE (Personal Protective Equipment), and watch the bloodborne pathogen training video. The items listed above are found on our corporation's website under the following link:

<http://www.wanee.org/UniversalPrecautionsTraining.aspx>

Once all components are complete, please submit the following certification form below to Jennifer Edwards (Wanee Corporation Nurse-NorthWood High School).

Employee Printed Name: _____

Job Title: _____

Date Training Was Completed: _____

The following signature certifies that the above-named employee has completed the WCS Blood Borne Pathogen and Other Infectious Agent Training
