

Support Our STEM Class

Dear Families,

At Wakarusa Elementary, our classrooms are full of designers, engineers, and amazing STEM learners. We are always using a variety of materials to create as we identify solutions to problems and create new inventions. Students will be solving problems and developing their creativity, communication, collaboration, and critical thinking skills every day.

We need your help! **Household items** will help us continue inventing solutions to problems. Students use these materials to design, build, test, and improve solutions to STEM challenges. You may already have some items to donate around your home, be able to collect them for us, or consider purchasing items for our classroom. Any donations are greatly appreciated!

Art supplies

Cardboard boxes

Cardboard tubes (paper towel, wrapping paper, toilet paper)

Coffee filters

Construction paper

Copy paper

Disposable cups

Empty plastic bottles (rinsed out)

Fabric scraps

Glue gun (low temp)

Glue sticks for glue gun (both sizes and temperatures)

Index cards

Paperclips

Paper plates

Paper towels

Plastic spoons

Pipe cleaners

Rubber bands

Scissors

Tape

Wooden craft sticks

Zip-top plastic baggies

If you are interested in checking out the STEM wish list on Amazon, scan the QR code below.

Thank you for supporting our young scientists and engineers!

Sincerely,

Mrs. Hunnings
STEM Instructor
